

WILLIAMS GODSWILL ALEX

Full-Stack Software Engineer

✉ williamsalexjr@gmail.com ☎ +2347012714644 📍 Nigeria

Professional Summary

Full-Stack Software Engineer with over 5 years of experience building, maintaining, and scaling web and mobile applications. Skilled in modern JavaScript frameworks and backend technologies. Passionate about problem-solving, learning new tools, and creating innovative digital solutions.

Work Experience

Software Engineer, <i>Uburu Health</i> - Optimized the company's core application, significantly improving overall system performance, responsiveness, and scalability for daily operations. - Refactored a large monolithic codebase by separating multiple user dashboards into independent applications, improving code maintainability, readability, scalability, and deployment efficiency. - Developed a high-performance Query-as-a-Service platform for medical research data, enabling fast, efficient, and reliable data access for researchers and healthcare professionals. - Designed and built a patient medical history matching platform that allows healthcare providers to retrieve patient medical records across multiple integrated medical facilities, enabling faster and more informed healthcare decisions. - Developed a medical document digitization platform that allows healthcare providers to scan paper medical reports using a mobile device camera, crop and process the images, and upload the files securely to AWS S3 for storage and access. - Built features that convert scanned medical documents into structured and searchable digital records, helping medical centers transition from paper-based records to digital systems and improving clinical and operational efficiency. - Collaborated with cross-functional teams including product managers, medical professionals, and researchers to design and implement scalable healthcare technology solutions. - Skill: Python (FastAPI), MySQL, Next.js, React.js, Git	03/2023 – Present Nigeria
Software Engineer, <i>Intelligent Innovations Co.</i> - Collaborated with Union Bank of Nigeria to develop a robust back-office system that streamlined internal operations and significantly improved organizational productivity and workflow efficiency. - Designed and implemented reusable email templates, improving communication consistency, reducing development time, and enhancing campaign delivery performance. - Developed a Nigerian-focused ed-tech platform that enables users to learn and monetize digital skills online, similar to modern e-learning marketplaces. - Built and maintained the company's primary website, ensuring high performance, responsiveness, and a seamless user experience across devices. - Developed a job marketplace platform that connects employers with job seekers, featuring job search, application management, and employer listing functionalities.	07/2021 – Present Nigeria

- Implemented scalable and maintainable frontend architectures using modern frameworks, improving application performance and developer efficiency.
- Managed version control and CI/CD workflows using Git, GitHub, and GitLab, improving deployment reliability and team collaboration.
- Skill: React.js, Git, Github, Nuxt.js, Nx, Gitlab, TailwindCSS, Next.js, Microsoft Azure, TypeScript

Software Engineer, Hokfam

05/2025 – 02/2026
United Kingdom

- Led the development of a clothing e-commerce platform, delivering a seamless shopping experience and a scalable backend for product, order, and payment management (Stripe payment gateway processor)
- Skill: Nest.js, PHP, RabbitMQ, MongoDB, Next.js, Git, TypeScript, Google Cloud

Software Engineer, Erudyte

01/2024 – 10/2024
USA

- Developed a modular ed-tech platform for the U.S. market, delivering role-based experiences for teachers, students, and administrators to support course delivery, progress tracking, and platform management.
- Skill: Next.js, GraphQL, Git, TailwindCSS, TypeScript, Nx

Software Engineer, Diamond Acre Software

02/2021 – 07/2021
Nigeria

- Developed a production-ready clothing e-commerce platform with full product management and order processing capabilities, enabling seamless online sales and inventory control.
- Implemented secure and scalable backend services using Express.js and PostgreSQL to handle product data, user authentication, and transaction workflows.
- Delivered the company's landing page, improving brand visibility, user engagement, and conversion rates through responsive and user-friendly design.
- Built an interactive mathematics quiz platform featuring automated grading, real-time result generation, and dynamic question handling.
- Designed and developed responsive frontend interfaces using React.js and Vue.js, ensuring a smooth and consistent user experience across devices.
- Deployed and managed applications on DigitalOcean, ensuring high availability, performance, and reliable production environments.
- Skill: Express, PostgreSQL, Digital Ocean, React.js, Quiser, Vue.js

Software Engineer & Tutor, Green Mouse Technologies

09/2020 – 02/2021
Nigeria

- Developed responsive and interactive front-end interfaces for web applications using HTML5, CSS3, JavaScript, jQuery, and Bootstrap.
- Applied CSS3 animations, transitions, and modern UI techniques to create engaging and user-friendly interfaces.
- Translated design concepts, wireframes, and mockups into functional web pages, supporting product design and development planning.
- Assisted in designing wireframes and mockups to improve user experience and interface layout before development.
- Mentored and trained students in web development fundamentals, coding best practices, and core web technologies including HTML, CSS, and JavaScript.
- Provided technical guidance and debugging support to students, helping them build real-world web development projects.
- Skill: HTML, CSS3, jQuery, Bootstrap, JavaScript

Education

Higher National Diploma (HND) - Computer Science,
Gateway Polytechnic, Saapade, Ogun State

2017
Nigeria

Technical Skills

Programming Language

PHP, JavaScript, Python

Databases and Message Queues

MongoDB, PostgreSQL, Redis, RabbitMQ

Libraries/Frameworks

React, Vue, React Native, Next.js, Nuxt.js, Electron.js, Tauri.js, Laravel, Express.js, Nest.js, FastAPI

Cloud Service and Infra Technologies

Render, Vercel, Digital Ocean, GCP, AWS, Git, Github
